Introduction

I am a multidisciplinary Graphic Designer, with interests in many different types of Design and Media. I live in programs like Photoshop and Illustrator, and like to go nuts with my new camera. I also edit movies and create small animations in After Effects. Whilst constantly looking for new ways to express my creativity, I am always ready for a challenge.

I am a great teamworker and believe that achievement is so much more rewarding when shared with others. I have just finished my two year education in Digital Media at Hyper Island*, Stockholm and I am currently looking for a job within Illustration/ Packaging Design/ Label Design/ Webdesign/ Final Art.

Background

I'm very active and like all kinds of sports. From a young age I've pursued sailing, soccer and dancing, performing in several major events. Snowboarding is a big interest of mine, along with longboarding, wakeboarding and surfing. Photography is another one of my hobbies, especially when I'm travelling. I never leave the house without my camera!
